

Amina Moutalibova

I'm Amina, a UX/UI designer who loves turning creative chaos into clarity. Where others might get lost in details, I see opportunities to bring structure and make stories tangible.

For me, design is not a series of pixels or buttons, but a way to make ideas understandable and valuable to people. My goal is always the same: To translate an idea into something that gives value and meaning.

Language

Dutch	Perfect
English	Perfect
French	Moderate
Chechen	Native language
